Giro dei Giganti

In the heart of the Gran Paradiso

4 days' trekking / 4 nights

An itinerary that runs mostly through the Gran Paradiso National Park, where a variety of rare alpine plant and wildlife species can be found. Walkers will have frequent opportunities to admire chamois darting gracefully through the park, or the elegant golden eagle in flight, or find themselves surrounded by a herd of male ibex, which, as the day draws to a close, gather to graze at the foot of the moraines and the everlasting snowfields. And your eyes will never tire of the views over the Gran Paradiso, Grivola and exceptionally pure water of the Djouan lake...
